

## Written Statements for an Off-grid PV system installation

System owner name: \_\_\_\_\_

Installation address: \_\_\_\_\_

State: \_\_\_\_\_ Date Installation completed: \_\_\_\_\_

	Name	CEC Accreditation (GC/SPS)	CEC Accreditation Number
<b>Installer</b>			
<b>Designer</b>			

I \_\_\_\_\_ (name of installer), **confirm:**

**1/** I have public liability insurance of at least \$5 million and am bound by the Clean Energy Council's Code of Conduct and have complied with that code of conduct for the installation of the above unit.

**2/** that all local, State or Territory government requirements have been met for the siting of the unit; and if the unit is attached to a building or structure — the attachment of the unit to the building or structure; and if the unit is grid-connected — the grid connection of the system for the SGU installation at the above address.

**3/** that the above installation complies with the following Australian Standards:

- AS/NZS 3000:2007, *Wiring Rules*;
- AS/NZS 1768:2007, *Lightning protection*;
- AS 4777—2005, *Grid connection of energy systems via inverters* (only if grid connected)

**4/** the above installation complies with the following Australian Standards:

- AS/NZS 5033:2005, *Installation of photovoltaic (PV) arrays*
- AS/NZS 1170.2:2002, *Structural design actions, Part 2: Wind actions*

**5/** that I installed a model of a photovoltaic module listed in AS/NZS 5033 Compliant PV Modules as in force from time to time and available at <http://www.cleanenergycouncil.org.au>; and (if the system uses an inverter) used a model of grid-connect inverter listed in Tested and Approved Grid Connected Inverters as in force from time to time and available at <http://www.cleanenergycouncil.org.au>

**6/** that the installation complies with the following Australian Standards:

- NZS 1170.2:2002, *Structural design actions, Part 2: Wind actions*.

**7/** that the SGU unit is **not grid-connected**; and an electrical worker holding an unrestricted license for electrical work issued by the State or Territory authority for the place where the unit was installed undertook all wiring of the unit that involves alternating current of 50 or more volts or direct current of 120 or more volts for the SGU installation at the above address.

8/ that the system meets the following Australian Standards:

- AS/NZS 4509.1:2009, *Stand-alone power systems, Part 1: Safety and installation*
- AS 4086.2—1997, *Secondary batteries for use with stand-alone power systems, Part 2: Installation and maintenance.*

I declare the above statements are true and understand that the provision of false and misleading information contravenes Section 24B of the Renewable energy (Electricity) Act 2000. Failure to comply with the Act can result in penalties and prosecution where warranted.
